

**Bits and cutters of industrial and dental quality: Accessories.**

**NO 28 941**

### **Three-jaw Steel Drill Chuck**

Allows to quickly and easily change accessories. Fits all MICROMOT rotary tools (except the Engraver GG 12, the Professional Rotary Tool IBS/E and the Cordless Professional Drill/Grinder IBS/A), Angle Attachment WS 90 and MICRO Mill MF 70. Will accept 1/64" to 1/8" (0.3 - 3.2mm) shanks. Thread: M8 x 0,75mm.

#### **Drill chuck or collet?**

Drill chucks provide more convenience to quickly change the tools when working with shafts of varying diameters. However, because of their technical setup, they have a few drawbacks compared to collets: Less clamping force and higher concentricity tolerances. If high precision is necessary, then working with MICROMOT steel collets is a must. See also note to the left.

**NO 28 940**

### **MICROMOT Steel Collet Set**

Triple slit and hardened. 1 each of 1 - 1.5 - 2 - 2.4 - 3 and 3.2mm (1/32" - 1/16" - 5/64" - 3/32" - 7/64" - 1/8"). With clamping nut and holder for storage.

#### **Note:**

MICROMOT steel collets are hardened and thus have a high, consistent flexibility. **1** They also maintain prolonged accuracy, even after regular use (these collets should not be compared with unhardened, four-slit collets of brass and aluminium). The triple slit collet is substantially more difficult to manufacture than the four-slit type, **2** but offers a better load-bearing surface. **3** This is especially important for cutters with small shaft diameters.

---

**NO 28 359**

***Holder for bits and cutters***

For the clean storage of micro drills, grinding bits, brushes and other rotating tools with shaft diameters of 2.35 - 3.2mm (3/32" - 1/8"). Without bits and cutters. Two pieces.

---

**NO 28 815**

***Spare Mandrels***

For all rotating accessories of the MICROMOTsystem without shank, all mandrels  $\varnothing$  2.35 x 44mm (3/32" x 1 3/4").
